Experience

Data Plus I.T. Solutions

Jul 2024 – Jul 2026

Software Developer

Quezon City, Metro Manila, PH

- Enhanced and maintained multiple enterprise systems, improving workflow efficiency by up to 30% through feature optimization and bug fixes.
- Collaborated with cross-functional teams to deliver client-specific requirements, reducing issue resolution time by 25%.
- Developed and co-developed internal systems, improving operational tracking and reducing manual processes across departments.

SlashdotPH

Nov 2023 - Mar 2024

Junior Programmer

Pasig City, Metro Manila, PH

- Maintained and upgraded CRM-based systems, enhancing user experience and increasing system usability for end-users.
- Resolved bugs and optimized database queries, improving system response time by 20%.
- Assisted in enhancing system stability, reducing reported issues by 15%.

Projects

Daily Time Record

- Designed and developed a full-featured time tracking system with attendance monitoring, leave application, and reimbursement management modules.
- Automated employee workflows, reducing manual tracking and processing time by 40%.
- Built a responsive UI utilizing Tailwind CSS and integrated backend APIs with Prisma for robust database schema management, real-time data processing, and reporting.

Customer Relationship Management System

- Designed and maintained an integrated CRM system suite consisting of a core CRM module, real-time monitoring dashboard, and ticketing management system, supporting end-to-end client operations.
- Implemented feature enhancements and resolved system issues based on client requirements, improving user efficiency by 20%, and reducing response time by 15%.
- Optimized database structure and backend processes across all modules, ensuring consistent data flow, real-time monitoring accuracy, and efficient ticket handling.

Corrective Action Report System

- Implemented feature enhancements based on business requirements, improving reporting accuracy, and reducing manual errors.
- Optimized data handling processes, enhancing system performance, and system reliability.

Financial Management and Inventory Control

- Configured financial and inventory modules within Microsoft 365 Dynamics Business Central, improving tracking accuracy and reducing reporting discrepancies by 25%.
- Customized business logic using AL and optimized Azure SQL database interactions, enhancing system adaptability and reducing data processing latency by 30% for client-specific workflows.

Online Permitting and Monitoring System

- Updated system features to align with client needs, improving workflow automation and system usability.
- Maintained backend logic and resolved system issues, reducing system downtime, and improving application stability.

Education

Eulogio "Amang" Rodriguez Institute of Science and Technology

Aug 2019 - Aug 2023

Bachelor of Science in Information Technology

Manila, Metro Manila, PH

Certifications

Manage Business Solutions with Microsoft Dynamics 365 Business Central	2025
Customized Microsoft SQL Server – ETL, Data Replication and High Availability	2024
