PROFESSIONAL SUMMARY

Results-driven Web Developer with experience in maintaining and enhancing enterprise applications using ASP.NET, PHP, Django, and modern JavaScript frameworks. Proven track record of improving system performance, implementing client-driven features, and contributing to scalable business solutions.

EXPERIENCE

Data Plus I.T. Solutions

Jul 2024 – Jul 2025

IT Developer

- Enhanced and maintained multiple enterprise systems, improving workflow efficiency by up to 30% through feature optimization and bug fixes.
- Collaborated with cross-functional teams to deliver client-specific requirements, reducing issue resolution time by 25%.
- Developed and co-developed internal systems, improving operational tracking and reducing manual processes across departments.

SLASHdotPH

Nov 2023 – Mar 2024

Junior Programmer

- Maintained and upgraded CRM-based systems, enhancing user experience and increasing system usability for end-users.
- Resolved bugs and optimized database queries, improving system response time by 20%.
- Assisted in enhancing system stability, reducing reported issues by 15%.

PROJECTS

Daily Time Record System (Next.js, Tailwind CSS, PostgreSQL)

- Designed and developed a full-featured time tracking system with attendance monitoring, leave application, and reimbursement management modules.
- Automated employee workflows, reducing manual tracking and processing time by 40%.
- Built a responsive UI utilizing Tailwind CSS and integrated backend APIs with Prisma for robust database schema management, real-time data processing, and reporting.

Customer Relationship Management System (CodeIgniter 4, Bootstrap, MySQL)

- Designed and maintained an integrated CRM system suite consisting of a core CRM module, real-time monitoring dashboard, and ticketing management system, supporting end-to-end client operations.
- Implemented feature enhancements and resolved system issues based on client requirements, improving user efficiency by 20% and reducing response time by 15%.
- Optimized database structure and backend processes across all modules, ensuring consistent data flow, real-time monitoring accuracy, and efficient ticket handling.

Corrective Action Report System (ASP.NET Core MVC, Bootstrap, Microsoft SQL)

- Implemented feature enhancements based on business requirements, improving reporting accuracy and reducing manual errors.
- Optimized data handling processes, enhancing system performance and system reliability.

Financial Management & Inventory Control (AL, Azure SQL)

- Configured financial and inventory modules within Microsoft 365 Dynamics Business Central, improving tracking accuracy and reducing reporting discrepancies by 25%.

- Customized business logic using AL and optimized Azure SQL database interactions, enhancing system adaptability and reducing data processing latency by 30% for client-specific workflows.

Online Permitting and Monitoring System (Django, Bootstrap, MySQL)

- Updated system features to align with client needs, improving workflow automation and system usability.
- Maintained backend logic and resolved system issues, reducing system downtime and improving application stability.

EDUCATION

Eulogio “Amang” Rodriguez Institute of Science and Technology – Bachelor of Science in Information Technology Aug 2019 - Aug 2023

SKILLS

Programming Languages: PHP, JavaScript, C#, Python, AL

Frameworks & Technologies: CodeIgniter 4, ASP.NET Core, Django, Next.js, Bootstrap, Tailwind CSS, Prisma

Databases: MySQL, Microsoft SQL, PostgreSQL

Tools & Platforms: Git, VS Code, Visual Studio, Microsoft Dynamics 365, Internet Information Services, Microsoft Azure

Other Skills: Debugging, System Maintenance, Client Requirement Analysis, API Integration
